“The impact of an uninsured pollution event can be financially devastating to businesses. Boardroom agendas need to take into account balance sheet exposure, reputation and corporate governance failure and other potential major issues associated with ESG.”

If an incident occurs, let us know immediately

First response should focus on the safety of people and property. Let us know as soon as the incident occurs. This allows Liberty to deploy environmental consultants, remediation experts, lawyers, and adjusters to act swiftly to mitigate, manage and remediate any damage before the claim is lodged.

Claims process

Once we have been notified of the claim, the claims process varies depending on the situation, the insured's expertise, and their ability to deploy initial mitigation activities.

High level claims process
