

## Shipbuilder's risk

### **Ship building is a key industry in Asia Pacific with seven of the top 10 largest global shipyards, by order book, located in the region.**

Liberty Specialty Markets (Liberty) ensures all shipbuilder's risk submissions are reviewed by our Marine Business Unit, including Underwriting, Risk Management Engineers and Claims.

For major shipyards, a current and satisfactory JH143 Shipyard Risk Assessment is considered mandatory at the time of risk submission. Without a satisfactory JH143 Shipyard Risk Assessment, Liberty may give a subjectivity provided that a satisfactory JH143 Shipyard Risk Assessment and/or a follow up JH143 Shipyard Risk Assessment is provided within a specified timeframe of policy inception.

For the smaller yards, our Marine Risk Management Engineers will visit the facility to conduct a Quality Operator Review (QOR) survey to assess the risk.

### **Coverage**

Liberty continues to grow its Shipbuilder's Risk Insurance product within the region and offers significant capacity.

Our Shipbuilder's Risk Insurance covers loss of, or damage to, the hull and machinery of vessels under construction.

In addition, cover is also provided for loss of, or damage to, property belonging to others and for death or personal injury caused to third parties during construction.
